Honorable Board of Commissioners
Community Development Commission
of the County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Commissioners:

**APPROVAL OF ALLOCATION OF CITY OF INDUSTRY REDEVELOPMENT
HOUSING SET-ASIDE FUNDS AND HOME INVESTMENT PARTNERSHIPS
FUNDS FOR THE DEVELOPMENT OF 60 UNITS OF AFFORDABLE HOUSING IN
UNINCORPORATED EAST LOS ANGELES AND APPROVAL OF
ENVIRONMENTAL DOCUMENTATION (1) (3 Vote)**

SUBJECT:

This letter requests that your Board approve the allocation of HOME Investment Partnership funds and City of Industry Funds to finance the site acquisition and construction of 3rd & Woods Family Housing, a multifamily rental housing development to be located in unincorporated East Los Angeles.

IT IS RECOMMENDED THAT YOUR BOARD:

1. Consider the attached Environmental Assessment/Mitigated Negative Declaration prepared pursuant to the requirements of the California Environmental Quality Act (CEQA), together with any comments received during the public review process, for the development of 3rd & Woods Family Housing (Project), an affordable multifamily rental housing development of up to 60 units, located at 5051 E. 3rd Street in the unincorporated community of East Los Angeles.
2. Find that with the incorporation of the mitigation measures identified in the Mitigation and Monitoring Plan, required as a condition of approval for the Project, the proposed building construction and associated property improvements will not have a significant effect on the environment; approve the Environmental Assessment/Mitigated Negative Declaration; find that the Project will have no adverse effect

on wildlife resources; and authorize the Executive Director of the Community Development Commission (Commission) to complete and file with the County Clerk a Certificate of Exemption for the Project.

3. Find that the Environmental Assessment/Mitigated Negative Declaration (EA/MND) for the Project reflects the independent judgment of the Commission, instruct the Executive Director to file with the County Clerk a Notice of Determination, as required by CEQA; and instruct the Executive Director to take any and all actions necessary to complete the implementation of this environmental review action for the Project.
4. Approve a loan to Woods Family Housing Partners, L.P. (Developer) using a total amount of up to \$2,037,000 in City of Industry Redevelopment Housing Set-Aside Funds (Industry Funds) and \$2,157,125 in HOME Investment Partnerships funds (HOME funds) for the development of the Project, which has been selected through a Notice Of Funding Availability (NOFA) jointly issued by the Housing Authority and the Commission on January 2, 2007, which loan will be administered by the Commission.
5. Authorize the Executive Director to use up to \$3,347,875 in HOME funds to acquire the Project site, located at 5051 E. 3rd Street (Property), from National Community Renaissance of California (CORE).
6. Authorize the Executive Director to use up to \$200,500 in HOME funds, as needed, for unforeseen Project costs related to the acquisition, construction and permanent financing of the Project.
7. Authorize the Executive Director to incorporate, as needed, a total of \$5,705,500 in HOME funds and \$2,037,000 in Industry Funds into the Commission's Fiscal Year 2007-2008 approved budget, for the purposes described above.
8. Authorize the Executive Director to negotiate a Loan Agreement with the Developer for the purposes described above, and authorize the Executive Director to execute the Loan Agreement and all related documents following approval as to form by County Counsel.
9. Authorize the Executive Director to negotiate Site Acquisition and Ground Lease Agreements with the Developer for the Project, for the purposes described above, and authorize the Executive Director to execute the Site Acquisition and Ground Lease Agreements and all related documents following approval as to form by County Counsel.
10. Authorize the Executive Director to execute documents to subordinate the loan and Ground Lease to permitted construction and permanent financing, to execute any necessary intergovernmental, interagency, or

inter-creditor agreements, and to execute and modify all related documents as necessary for the implementation of the Project.

PURPOSE /JUSTIFICATION OF RECOMMENDED ACTION:

The purpose of the recommended actions is to approve environmental documentation, site acquisition and the allocation of Industry Funds and HOME funds for 3rd & Woods Family Housing, an affordable multifamily rental housing development located at 5051 E. 3rd Street in unincorporated East Los Angeles. Funding approval will increase the ability of the Developer to leverage other non-County funding sources.

FISCAL IMPACT/FINANCING:

There is no impact on the County general fund.

The Commission is recommending loaning funds to the Developer in a total amount of up to \$2,157,125 in HOME funds and \$2,037,000 in Industry Funds to construct the Project. Further, up to \$3,347,875 of HOME funds will be used to fund the Commission's acquisition of the Property from CORE.

A contingency of up to \$200,500 in HOME funds is being set aside for unforeseen costs related to acquisition, construction and permanent financing costs of the Project.

Final loan amounts will be determined following completion of negotiations with the Developer and arrangements with other involved lenders. Each loan will be evidenced by a promissory note and secured by a deed of trust, with the term of affordability enforced by a recorded Covenants, Conditions and Restrictions document.

A Financial Analysis is provided as Attachment A.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS:

On December 20, 2005, your Board authorized the Commission to administer Industry Funds on behalf of the Housing Authority for development of affordable housing projects when such projects are also funded with a majority of HOME funds.

The current funding recommendations will provide HOME funds and Industry Funds to the Developer through a Loan Agreement with the Commission, to be executed by the Executive Director following completion of financial arrangements and approval as to form by County Counsel. The Loan Agreement will incorporate affordability restrictions and provisions requiring the Developer to comply with all applicable federal, state, and local laws.

The Developer, a limited partnership will be the legal recipient of HOME funds and Industry Funds and will also be named as Tenant or Lessee in the Ground Lease

Agreement for the Property. The Southern California Housing Development Corporation of Los Angeles (SCHDC-LA) will be the managing general partner for the Developer. SCHDC-LA is a 501(c)(3) non-profit Community Housing Development Organization.

The Project was selected for funding through the Commission's HOME and Industry Notice of Funding Availability (NOFA) process in 2007. The HOME loan (in the anticipated net amount of \$2,157,125 after Property acquisition funding) and the Industry loan will be subordinated to the construction and permanent financing provided by private financial institutions and other public sources.

The Commission intends to purchase the Property from CORE, the parent company of SCHDC-LA, for a total amount not to exceed \$3,347,875. Following acquisition, the Commission will lease the Property to the Developer for a period of 99 years. The Developer may acquire additional land contiguous to the Property. If additional land is acquired, it will be conveyed to the Commission and the Loan Agreement and the Ground Lease Agreement will be amended to reflect the additions.

The Project will consist of up to 60 units. Fifty-nine units will be set-aside for low-income families with incomes at or below 50% of the area median income (AMI), as defined by the U.S. Department of Housing and Urban Development (HUD) for the Los Angeles-Long Beach Metropolitan Statistical Area, adjusted for household size. The remaining unit will be set aside for the manager and will have no income restrictions. It is anticipated that six of the 59 affordable units will be reserved for families with incomes at or below 30% of AMI. The Project will also include up to 3,000 square feet of commercial space, the use of which will be determined at a later date, subject to approval by the Commission.

The Commission plans to acquire the Property and Ground Lease it to the Developer. This will permit the Commission to retain long term site ownership of unincorporated County land. The Ground Lease will be executed concurrently with the acquisition of the Property, enabling the Developer to maintain and evidence uninterrupted site control.

The Project is federally funded and not subject to the requirements of the Greater Avenues for Independence (GAIN) Program or the General Relief Opportunity for Work (GROW) Program, implemented by the County of Los Angeles. Instead, the Developer will comply with Section 3 of the Housing and Community Development Act of 1968, as amended, which requires that employment and other economic opportunities generated by certain HUD assistance be directed to low- and very low-income persons, particularly to persons who are recipients of HUD housing assistance.

ENVIRONMENTAL DOCUMENTATION:

An Environmental Assessment was prepared for the project pursuant to the requirements of the National Environmental Policy Act of 1969 (NEPA). This document describes the proposed project, evaluates the potential environmental effects, and describes the mitigation measures necessary to avoid potentially

significant environmental effects from the project. Based on the conclusions and findings of the Environmental Assessment, a Finding of No Significant Impact was approved by the Certifying Official of the Community Development Commission on September 20, 2007. Following the required public and agency comment period, HUD issued a Release of Funds for the Project on October 5, 2007.

Consistent with the provisions of the CEQA Guidelines, Article 14, Section 15221, notice was provided to the public that the Environmental Assessment would be used in place of an Initial Study to satisfy CEQA requirements. The EA/MND was circulated for public review as required by state and local law, and the EA/MND, in conjunction with the Mitigation and Monitoring Plan, meets the requirements of CEQA.

Approval of the EA/MND, including the Mitigation and Monitoring Plan, and filing of a Notice of Determination with the County Clerk will satisfy CEQA requirements. A fee must be paid to the State Department of Fish and Game when certain notices required by CEQA are filed with the County Clerk. The Commission is exempt from paying this fee when your Board finds that the Project will have no significant impact on wildlife resources. The Project is located in an urban setting, and the EA/MND concludes that there will be no adverse effect on wildlife resources.

The environmental review record for this Project is available for public viewing during regular business hours at the Commission's main office located at 2 Coral Circle in Monterey Park.

IMPACT ON CURRENT PROGRAM:

The requested actions will increase the supply of affordable housing for low-income families in the County.

Respectfully submitted,

for CARLOS JACKSON
Executive Director

Attachments: 3

ATTACHMENT A **HOUSING FINANCIAL ANALYSIS** **3rd and Woods Family Housing**

The Project will be located on the northwest corner of East Third Street and South Woods Avenue in unincorporated East Los Angeles. The Project will consist of up to 60 two- and three-bedroom units to serve low-income families.

The following is a financial analysis of the Project:

	TOTAL	PER UNIT
USES		
Total Development Cost	\$27,426,224	
<i>Less: Commercial Space Costs</i>	<i>\$ (458,469)</i>

ATTACHMENT B

**ENVIRONMENTAL ASSESSMENT
MITIGATED NEGATIVE DECLARATION**

**County of Los Angeles
Community Development Commission**

**DRAFT MITIGATED NEGATIVE DECLARATION
CALIFORNIA ENVIRONMENTAL QUALITY ACT**

PROJECT TITLE: 3rd and Woods Mixed Use Construction Project

PROJECT DESCRIPTION: The proposed project involves the demolition of an existing 2-story commercial building and construction of affordable housing and retail space. The new 4-story building would provide 60 units of affordable housing with surface and underground parking. The ground floor of the development would include approximately 9,000 square feet of commercial space and 2,100 square feet of recreational space. The project would cover approximately 60,000 square feet.

The site is zoned LCC3 (Commercial Office). A zone change would be necessary.

PROJECT LOCATION: The project site is located at 5051 E. 3rd Street, in unincorporated Los Angeles County, California.

MITIGATION MEASURES INCLUDED IN THE PROJECT TO AVOID POTENTIALLY SIGNIFICANT IMPACTS:

The following mitigation measures are required:

- 1. Archaeological Resources.** In the event that archaeological resources are unearthed during project construction, all earth disturbing work within the APE must be temporarily suspended until an archaeologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. A Gabrielino representative should monitor any archaeological field work associated with Native American materials. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the Los Angeles County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
- 2. Hazardous Materials.** In accordance with the Phase II Environmental Assessment for the project site, conducted by Converse Consultants, the following mitigation measures shall be implemented prior to project development:
 - Concentrations of TPH-G in samples from three borings (GP-4, GP-5 and GP-10) at a depth of 5 feet below ground surface (bgs) were reported in excess of the (Maximum Soil Screening Level) MSSSL. These samples, as well as the 5-foot sample from GP-11 and the 10-foot sample from GP-4, were reported to contain various VOCs at concentrations exceeding the respective PRG-r values. As a result, soil within the vicinity of these boring shall be removed to a depth of 10 bgs.

- The concentration of benzene in the soil sample from boring GP-1 at a depth of 15 feet bgs exceeded the PRG-r. Therefore, the soil within a 10-foot by 10-foot area in the vicinity of boring GP-1 to a depth of 20 feet bgs shall be removed and disposed.
 - All remedial activities shall be overseen by the Los Angeles County Fire Department's (LACFD) Site Mitigation Unit in order to obtain a "closure" or "no further action" letter with regards to contaminants identified in the onsite soil.
3. **Noise.** In order to ensure an acceptable interior noise environment at the proposed apartment complex (45 dBA or less), the following shall be included in project design:
- Air conditioning or a mechanical ventilation system shall be provided so that windows and doors may remain closed.
 - Windows and sliding glass doors facing 3rd Street and Woods Avenue shall have a Sound Transmission Class (STC) rating of at least 33, per ANSI specifications.
 - Exterior doors facing 3rd Street and Woods Avenue shall be solid-core with perimeter weather stripping and threshold seals.
4. **Solid Waste Recycling.** Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.
5. **Water Supply.** Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design:
- To the degree feasible, landscaped areas shall be designed with drought-tolerant species. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice.
 - All new structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.
6. **Additional Modifications.** Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission (CDC) of Los Angeles County.

HUD – NEPA – Environmental Assessment

Project Name and Identification Number: Red Cross Mixed Use Construction Project /HMD001

HUD – NEPA- ENVIRONMENTAL ASSESSMENT

- Project Name:** 3rd and Woods Mixed Use Construction Project
- Project Location:** The project site is located at 5051 E. 3rd Street, in unincorporated Los Angeles County, California. Figure 1 shows the regional location of the project, and Figure 2 shows the location of the project site within Los Angeles County.
- Assessor's Parcel Number(s):** 5250-003-901, 902 & 903
- Statement of Need:** The project is consistent with the guidelines of the CDBG program. The proposed project provides for the development of affordable housing.
- Project Description:** The proposed project involves the demolition of an existing 2-story commercial building and construction of affordable housing and retail space. The new 4-story building would provide 60 units of affordable housing with surface and underground parking. The ground floor of the development would include approximately 9,000 square feet of commercial space and 2,100 square feet of recreational space. The project would cover approximately 60,000 square feet.
- The site is zoned LCC3 (Commercial Office). A zone change would be necessary.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
Land Development							
Conformance With Comprehensive Plans and Zoning	X						The site is zoned LCC3 (Commercial Office). A zone change would be necessary (a).
Compatibility and Urban Impact	X						The project site is bound by single family residences to the north, 3 rd Street and commercial buildings to the south, Woods Street and a Kaiser Permanente building to the east and the East Los Angeles Sheriff's Station to the west (b). The proposed project would be compatible with the scale and type of surrounding development.
Slope	X						The project site is generally flat (b). The proposed development would not involve major topographic modifications or create any significant erosion or sedimentation problems.
Erosion	X						There is no evidence of any substantial erosion problems onsite (b). The project would not involve any ground disturbance as it involves the development of housing on top of a parking structure.
Soil Suitability	X						There is no evidence of soil suitability problems on the project site (b). Routine soil tests would need to be conducted to determine foundation design parameters for new structures.
Hazards and Nuisances, Including Site Safety					X		A Phase I Environmental Site Assessment was conducted on the project site by DCI Environmental Services in September of 2006 (c). As a result of the former gas station located adjacent to the east of the project site, DCI Environmental Services determined that soil sampling shall be performed prior to site development (c). Pursuant to the determination made by DCI Environmental Services, a Limited Phase II Environmental Site Assessment was conducted on the project site by Converse Consultants in June of 2007 (l). Based on the sampling and analyses of onsite soils, Converse Consultants concluded that in specified locations soil shall be removed and disposed prior to site development.
Energy Consumption	X						Project operation would incrementally increase the consumption of electricity and natural gas. However, because these resources are available both locally and regionally, no significant impact to the availability of energy resources is expected over the long-term. The project would comply with state energy conservation requirements.
Noise							
Effects of Ambient Noise on Project and Contribution to Community Noise Levels					X		Project construction would generate temporary noise level increases. Local noise ordinances would apply.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
							The proposed project involves the development of affordable housing and is not expected to generate substantial noise. The project is itself a noise sensitive use. A noise measurement was taken at the project site on March 12, 2007. The noise measurement indicated a noise level of 68.0 dBA Leq. Thus, noise levels onsite may exceed HUD's 65 decibel Ldn exterior standard for residences.
Air Quality							
Effects of Ambient Air Quality on Project and Contribution to Community Air Pollutant Levels	X						<p>The project site is located in the South Coast Air Basin, which is a nonattainment area for ozone, carbon monoxide, and fine particulate matter (PM₁₀). Project residents would be exposed to potentially unhealthy ambient air because this regional condition cannot be feasibly mitigated. Traffic associated with the project would incrementally increase air pollutant emissions, but such emissions would not exceed locally adopted significance thresholds or hinder attainment of state or federal air quality standards (d).</p> <p>Existing South Coast Air Quality Management District (SCAQMD) regulations restrict the emissions of dust and fumes during construction and the project would be required to conform to these requirements.</p>
Environmental Design and Historic Values							
Visual Quality - Coherence, Diversity, Compatible Use, and Scale	X						The proposed project would involve the development of 60 units of affordable housing, retail space, and subsurface parking. The surrounding land uses consist of residential, commercial, and office development (b). The project would be compatible with the visual context of the existing neighborhood.
Historic, Cultural, and Archaeological Resources					X		Historic and archaeological evaluations were conducted for the project site (see attached reports prepared by San Buenaventura Research Associates [e] and Conejo Archaeological Consultants [f]). Based on the historic resources evaluation, the project site is not eligible for listing on the National Register of Historic Places. Conejo Archaeological Consultants determined that no known archaeological resources would be adversely affected by project implementation. However, during grading, or any other earth moving events, discovery of any archaeological finds would require immediate cessation of activities and review by a qualified professional of the find for recommendations.
Socioeconomic Conditions							

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
Demographic/Character Changes	X						The proposed project includes 60 units of affordable housing intended to serve the housing needs of current area residents. Assuming one to three persons per household, this would accommodate a population of about 60 to 180 people. The development would serve the existing area population and such a population increase would not substantially change the demographic character of the area.
Displacement	X						Development of the proposed project would not displace any residences. However, the demolition of the existing onsite building would require the relocation of Red Cross offices.
Employment and Income Patterns	X						The proposed project would generate temporary employment opportunities during construction and long-term employment opportunities at the retail space on the ground floor of the proposed structure. No adverse impacts to employment or income patterns are expected.
Community Facilities and Services							
Educational Facilities	X						The proposed project is an affordable housing development. It would be expected to generate additional students at area schools. However, the developer would be required to pay State-mandated school impact fees to provide funding for any needed facilities expansions.
Commercial Facilities		X					The proposed project would not adversely affect commercial facilities and may incrementally increase the customer base for existing commercial businesses. The project includes ground floor commercial space.
Health Care	X						The proposed project may incrementally increase demand for health care services; however, because it is intended to serve the housing needs of current area residents, it would not affect health care facilities or services.
Social Services		X					The proposed project would provide affordable housing for current area residents. It would not require any new social services.
Solid Waste					X		The proposed project would incrementally increase the generation of solid waste over existing conditions. This increase is not expected to significantly affect area landfills. Nevertheless, because of ongoing concerns about regional landfill capacity, project design should accommodate solid waste recycling.
Waste Water	X						The proposed project would increase wastewater generation as compared to the current use of site. However, it is expected that the current wastewater infrastructure that is in place would accommodate urban development similar to that proposed. Any needed system improvements would be made in conjunction with site

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
							development.
Storm Water	X						The proposed project would not increase stormwater generation as impervious surfaces currently cover the entire project site. Storm drains would be installed on the site as part of project development and would be sized adequately to accommodate runoff from the site. The project would comply with local, state, and federal requirements pertaining to control of stormwater runoff. Therefore, significant impacts are not anticipated.
Water Supply					X		Water service would be provided by the Los Angeles County Waterworks (a). The proposed project would incrementally increase water consumption as compared to the current use but is not expected to significantly affect water supply. Nevertheless, because of ongoing concerns about water supply in the Southern California region, water conservation measures shall be incorporated into the design of the project.
Public Safety Police	X						The Los Angeles County Sheriff's Department's East Los Angeles Station, located adjacent to the project site at 5019 East Third Street, provides police protection services in the project vicinity (a, g). The proposed project would incrementally increase demand for police protection services. However, this increase would be nominal and no adverse impacts to police services are expected.
Fire	X						The Los Angeles County Fire Department Station 22 would provide fire protection, paramedic and emergency medical technician services to the project site. The station is located 928 South Gerhart Avenue, approximately 1.7 miles southeast of the project site (a, g). The proposed project would incrementally increase the demand for fire protection services; however, the site is within the existing service area. Assuming compliance with Fire Department requirements, no adverse impacts to fire protection services are anticipated from development of the project.
Emergency Medical	X						The Los Angeles County Fire Department would provide emergency medical services. Emergency victims would be taken to the Los Angeles County King-Drew Medical Center or Robert F. Kennedy Medical Center emergency rooms (a, g). No adverse impacts to emergency medical services are anticipated.
Open Space And Recreation Open Space	X						The proposed project would not adversely affect any areas designated as public open space.
Recreation	X						Belvedere Park and Obregon Park are located

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
							approximately 0.2 miles northwest and 1 mile west of the site, respectively (g). No adverse impacts to these facilities would occur.
Cultural Facilities	X						The proposed project would not adversely affect any cultural facilities (b).
Transportation	X						The proposed project would generate an estimated 234 average daily vehicle trips (ADT) (h). This would incrementally increase traffic on roadways in the immediate project vicinity, but is less than the 500-trip threshold at which the County of Los Angeles normally requires a traffic study. Significant impacts to the area circulation system are not anticipated.
Natural Features							
Water Resources	X						The proposed project would not affect water resources (b).
Surface Water	X						No surface water is located onsite. Therefore, no impacts to surface water would occur.
Watercourses	X						There are no watercourses within the vicinity of the project area (a, b). No impact to watercourses is anticipated.
Unique Natural Features and Agricultural Lands	X						The project site is in a highly urbanized area. The proposed project would not affect any natural features. No active agricultural lands or agriculturally zoned lands are present within the project area (a, b).
Vegetation and Wildlife	X						The project site is in a highly urbanized area. No important biotic communities exist and no wildlife was observed onsite (b). Therefore, the project would not significantly affect vegetation or wildlife.
Long-Term Effects							
Growth-Inducing Impacts	X						The proposed project would provide affordable housing and could directly induce population growth. However, the project is intended to provide housing services for existing City residents and thus is not expected to attract a significant number of people from outside the region. The project would not require the extension of infrastructure or roadways since the site has been developed in the past. Therefore, the project's potential to induce growth is not considered significant.
Cumulative Effects	X						The proposed project would provide infill development in an urbanized area. While it would increase the intensity of development on the project site, it would not result in any significant impacts that would be cumulatively considerable.

10. Environmental Justice Executive Order 12898	X					The proposed project would provide additional employment opportunities in the community as well as affordable housing for area residents. The project would not expose low-income or minority populations to any environmental justice concerns.
11. HUD Environmental Standards, 24 CFR 51 as amended						
a. Noise Abatement 24 CFR 51B	X					<p>Project construction would generate temporary noise level increases. Local noise ordinances would apply.</p> <p>The proposed project involves affordable senior housing and is not expected to generate substantial noise. The project is itself a noise sensitive use. A noise measurement was taken at the project site on March 12, 2007. The noise measurement indicated a noise level of 68.0 dBA. Therefore, onsite noise levels may exceed HUD's 65 decibel Ldn exterior standard for residences.</p>
b. Landfill Hazards CPD Letter 79-33	X					The project site is not subject to any known landfill hazards (b, c).
c. Upset Hazards 24 CFR 51B	X					The project site is not subject to any known upset hazards, nor would the proposed use create any significant upset hazards (b).

Area of Statutory/ Regulatory Compliance	Not Applicable To this Project	Consultation Required and Completed	Permits Required and Obtained	Project Consistent with Applicable Policies	Conditions and/or Mitigation Actions Required	Note Compliance Documentation
d. Flammable Oper. 24 CFR 51C	X					The project site is not subject to any known flammable operations or explosives (b).
e. Toxic/Radioactivity HUD Notice 79-33					X	The project site is not subject to any known radioactivity (b). A Phase I Environmental Site Assessment was conducted on the project site by DCI Environmental Services in September of 2006 (c). As a result of the former gas station located adjacent to the east of the project site, DCI Environmental Services determined that soil sampling shall be performed prior to site development (c). Pursuant to the determination made by DCI Environmental Services, a Limited Phase II Environmental Site Assessment was conducted on the project site by Converse Consultants in June of 2007 (l). Based on the sampling and analyses of onsite soils, Converse Consultants concluded that in specified locations soil shall be removed and disposed prior to site development.
f. Airport Clear Zones 24 CFR 51D	X					The project site is not in an airport clear zone (a).

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Summary of Findings and Conclusions:

The proposed project involves the demolition of an existing 2-story commercial building and the construction of a 4-story building with 60 units of affordable housing in 6 one-bedroom, 35 two-bedroom, and 18 three-bedroom units with surface and underground parking. The ground floor of the development would include approximately 9,000 square feet of commercial space and 2,100 square feet of recreational space. The project would cover approximately 60,000 square feet. The project site would be re-zoned from LCC3 (Commercial Office) to a zoning which would permit the proposed project. Neighboring land uses consist of residential, commercial and office development. The proposed project would be compatible with the scale and visual character of the surrounding area.

The project site is generally flat. No watercourses or water resources are located in the project area. No threatened or endangered wildlife was observed on the site. Previous land uses onsite resulted in the discharge of waste materials and wastewater. A Phase I Environmental Site Assessment was conducted on the project site by DCI Environmental Services in September of 2006. As a result of the former gas station located adjacent to the east of the project site, DCI Environmental Services determined that soil sampling shall be performed prior to site development. Pursuant to the determination made by DCI Environmental Services, a Limited Phase II Environmental Site Assessment was conducted on the project site by Converse Consultants in June of 2007. Based on the sampling and analyses of onsite soils, Converse Consultants concluded that in specified locations soil shall be removed and disposed prior to site development.

The proposed project would not significantly affect public facilities. Implementation of the project would create temporary employment opportunities during construction and long-term employment opportunities during operation of the proposed ground-level retail space. The proposed project is not expected to disturb either historic or archaeological resources.

The proposed project would not consume substantial quantities of water or energy or generate substantial quantities of solid waste or wastewater. Nevertheless, water conservation measures and recycling facilities should be incorporated into project design. The project is located outside the 500-year flood area, indicating minimal flood potential in the area.

The proposed project would conform to all applicable federal, state, and regional air pollution control regulations, and would not significantly affect local or regional air quality. The project would incrementally increase daily traffic volumes in the immediate area; however, project-generated traffic would not significantly affect local roadways. A 20-minute noise measurement taken onsite indicated a noise level of 68.0 dBA Leq. Thus, site residences could be exposed to noise exceeding HUD standards.

Summary of Environmental Conditions:

The project site is located in a highly urbanized area. No wildlife was observed onsite.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

Project Modifications and Alternatives Considered:

No unavoidably significant impacts were identified for the proposed project. Therefore, project alternatives or modifications have not been considered.

Mitigation Measures Required:

The following mitigation measures are required:

- 1. Archaeological Resources.** In the event that archaeological resources are unearthed during project construction, all earth disturbing work within the APE must be temporarily suspended until an archaeologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. A Gabrielino representative should monitor any archaeological field work associated with Native American materials. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the Los Angeles County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
- 2. Hazardous Materials.** In accordance with the Phase II Environmental Assessment for the project site, conducted by Converse Consultants, the following mitigation measures shall be implemented prior to project development:
 - Concentrations of TPH-G in samples from three borings (GP-4, GP-5 and GP-10) at a depth of 5 feet below ground surface (bgs) were reported in excess of the (Maximum Soil Screening Level) MSSL. These samples, as well as the 5-foot sample from GP-11 and the 10-foot sample from GP-4, were reported to contain various VOCs at concentrations exceeding the respective PRG-r values. As a result, soil within the vicinity of these boring shall be removed to a depth of 10 bgs.
 - The concentration of benzene in the soil sample from boring GP-1 at a depth of 15 feet bgs exceeded the PRG-r. Therefore, the soil within a 10-foot by 10-foot area in the vicinity of boring GP-1 to a depth of 20 feet bgs shall be removed and disposed.
 - All remedial activities shall be overseen by the Los Angeles County Fire Department's (LACFD) Site Mitigation Unit in order to obtain a "closure" or "no further action" letter with regards to contaminants identified in the onsite soil.
- 3. Noise.** In order to ensure an acceptable interior noise environment at the proposed apartment complex (45 dBA or less), the following shall be included in project design:
 - Air conditioning or a mechanical ventilation system shall be provided so that windows and doors may remain closed.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

- Windows and sliding glass doors facing 3rd Street and Woods Avenue shall have a Sound Transmission Class (STC) rating of at least 33, per ANSI specifications.
 - Exterior doors facing 3rd Street and Woods Avenue shall be solid-core with perimeter weather stripping and threshold seals.
4. **Solid Waste Recycling.** Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.
5. **Water Supply.** Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design:
- To the degree feasible, landscaped areas shall be designed with drought-tolerant species. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice.
 - All new structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.
6. **Additional Modifications.** Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission (CDC) of Los Angeles County.

Project-generated traffic was calculated by multiplying the project size (units) by the applicable trip generation rate. The average daily traffic (ADT) rate for mid-rise apartments (3 to 10 levels) is 3.9 trips per unit and there are 60 proposed units. Therefore, approximately 234 ADT would be generated by the proposed project (3.9×60).

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

1. Is the project in compliance with applicable laws and regulations? ☒Yes ☐No
2. Is an EIS required? ☐Yes ☒No
3. A Finding of No Significant Impact (FONSI) can be made. The project will not significantly affect the quality of the human environment. ☒Yes ☐No

Basic Reasons Supporting Decision:

The proposed project involves the development of a 4-story building with 60 units of affordable housing in 6 one-bedroom, 35 two-bedroom, and 18 three-bedroom units with surface and underground parking. The proposed project would further the County's goals of providing affordable housing for current area residents. The project involves infill development in a highly urbanized area of Los Angeles County. Based on the Environmental Assessment, it has been determined that with implementation of recommended mitigation measures, the proposed project would not generate any significant environmental impacts.

The following mitigation measures are required:

1. **Archaeological Resources.** In the event that archaeological resources are unearthed during project construction, all earth disturbing work within the APE must be temporarily suspended until an archaeologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. A Gabrielino representative should monitor any archaeological field work associated with Native American materials. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the Los Angeles County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
2. **Hazardous Materials.** In accordance with the Phase II Environmental Assessment for the project site, conducted by Converse Consultants, the following mitigation measures shall be implemented prior to project development:
 - Concentrations of TPH-G in samples from three borings (GP-4, GP-5 and GP-10) at a depth of 5 feet below ground surface (bgs) were reported in excess of the (Maximum Soil Screening Level) MSSL. These samples, as well as the 5-foot sample from GP-11 and the 10-foot sample from GP-4, were reported to contain various VOCs at concentrations exceeding the respective PRG-r values. As a result, soil within the vicinity of these boring shall be removed to a depth of 10 bgs.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 3rd and Woods Mixed Use Construction Project /HMD001

- The concentration of benzene in the soil sample from boring GP-1 at a depth of 15 feet bgs exceeded the PRG-r. Therefore, the soil within a 10-foot by 10-foot area in the vicinity of boring GP-1 to a depth of 20 feet bgs shall be removed and disposed.
 - All remedial activities shall be overseen by the Los Angeles County Fire Department's (LACFD) Site Mitigation Unit in order to obtain a "closure" or "no further action" letter with regards to contaminants identified in the onsite soil.
3. **Noise.** In order to ensure an acceptable interior noise environment at the proposed apartment complex (45 dBA or less), the following shall be included in project design:
- Air conditioning or a mechanical ventilation system shall be provided so that windows and doors may remain closed.
 - Windows and sliding glass doors facing 3rd Street and Woods Avenue shall have a Sound Transmission Class (STC) rating of at least 33, per ANSI specifications.
 - Exterior doors facing 3rd Street and Woods Avenue shall be solid-core with perimeter weather stripping and threshold seals.
4. **Solid Waste Recycling.** Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.
5. **Water Supply.** Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design:
- To the degree feasible, landscaped areas shall be designed with drought-tolerant species. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice.
 - All new structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.
6. **Additional Modifications.** Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission (CDC) of Los Angeles County.

Re: Red Cross Mixed Use Construction Project

1. Description of Undertaking

The Los Angeles County Community Development Commission plans to use federal funds to demolish an existing 2-story commercial building and construct an affordable housing and retail building at 5051 E. 3rd Street in unincorporated East Los Angeles. The new 4-story building will provide 60 units of affordable housing in 6 one-bedroom, 35 two-bedroom, and 18 three-bedroom units with surface and underground parking. The ground floor of the development will include approximately 9,000 square feet of commercial space and 2,100 square feet of recreational space. The project will cover approximately 60,000 square feet. [Figure 1]

2. Area of Potential Effect

The Area of Potential Effect (APE) includes the project site itself (APN 5250-003- 901, 902, 903), the adjacent properties and the properties across the street from the project site.

3. Description of Location of Undertaking

The project site contains three parcels, with frontage on Third Street extending to Woods Avenue on the east. The project site contains one two-story modern office building and a parking lot on the east. [Photo 1] Adjacent and west of the project site on Third Street is the Sheriff's Station. [Photo 2]

Adjacent to the project site to the east is Woods Avenue. [Photo 2] Behind the project site is an alley and a residential subdivision from the 1940s and 1950s that faces onto Telford Street. [Photo 3] Across Woods Avenue from the project site is a hospital from the 1980s and later. [Photos 4] Across 3rd Street from the project site is the gas company building dating from the 1930s or later. [Photos 5-6]

4. Historic Resources/National Register Determination

Historical Background

The project site is located in a section of of Los Angeles County known as East Los Angeles, a somewhat indefinite area typically defined as encompassing the land between the Los Angeles River on the west and the cities of Alhambra, Monterey Park and Montebello on the east, the City of Commerce on the south and Glendale on the north. Greater East Los Angeles is composed of numerous, fairly distinct, and mainly unincorporated communities. Among these are Highland Park, El Sereno, Brooklyn Heights, Boyle Heights, Lincoln Heights, and City Terrace. Other, less well-defined portions of the dis-

Red Cross Mixed Use Construction Project (2)

tract lacking any specific neighborhood identification are referred to today simply as East Los Angeles, in particular, the unincorporated sections of Los Angeles County located between the Pomona and Golden State freeways.

With the explosive growth of the Los Angeles region during the first decades of the twentieth century, the character of East Los Angeles began a rapid transition from ranching, vegetable growing, fruit farming and dairies to working-class streetcar suburbs. The many and various neighborhoods of East Los Angeles which developed during the 1900s, 1910s and 1920s, quickly took on the distinct ethnic characters of the immigrants who settled them.

Notable populations of Russians, Armenians, Jews, Chinese, Italians, Japanese, and Mexicans coalesced in East Los Angeles. By 1930, these neighborhoods had developed individual, well-recognized social, political and economic identities. After 1940, however, many of these ethnic groups began to disburse, and the ethnic composition of East Los Angeles shifted, taking on the predominantly Mexican-American character it reflects today.

The project site and surrounding area during the 1930s and 1940s was devoted to citrus orchards. By the late 1940s, there was a small building on the third parcel at the eastern edge of the project site. By the 1950s housing tracts to the north replaced the orchards. Aerial photographs in 1953 show a building on the middle parcel of the project site. In 1964 the two-story office building was constructed at 5051 E. Third Street, the western most parcel of the project site. Eventually the two buildings east of the office building were replaced by the present parking lot.

Physical Description

5051 E. Third Street: This site contains a large two-story modern 17,556 square foot office building constructed in 1964 with a large parking lot to the east.

Telford Avenue. This street runs north of the project site and is within the APE. It is a residential area constructed during the 1950s. The houses in this area back up to the rear of the project site. They are one-story single family residences, rectangular in plan, with hip roofs and ? siding.

303 S. Woods Avenue. This building was constructed in 1948 and is a Southern California Gas Company building. The building is rectangular in plan with a flat roof and a grouping of multi-paned windows across the front of the building.

National Register Eligibility

The criteria for determining eligibility for listing on the National Register of Historic Places (NRHP) have been developed by the National Park Service. Properties may qualify for NRHP listing if they:

- A. are associated with events that have made a significant contribution to the broad patterns of our history; or
- B. are associated with the lives of persons significant in our past; or

Red Cross Mixed Use Construction Project (3)

- C. embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. have yielded, or may be likely to yield, information important in prehistory or history.

The residential buildings within the APE behind the project site on Telford Avenue and the gas company building on 3rd Street do not appear to be associated with an event that has made a significant contribution to the history of the East Los Angeles community (Criterion A). Although they were part of the early residential development of the region, these buildings do not appear to have played a significant role in this development.

The residences and gas company building within the APE do not appear to be associated with the lives of any significant persons (Criterion B). The buildings do not embody the distinctive characteristics of a type or method of construction (Criterion C). They are ordinary examples of their style and period. Criterion D applies to archaeology and is not relevant in this case.

The minimum age criterion for the National Register of Historic Places (NRHP) is 50 years. Properties less than 50 years old may be eligible for listing on the NRHP if they can be regarded as "exceptional," as defined by the NRHP procedures.

The remaining properties within the APE were all constructed between 1964 and the present day. In order for them to be eligible for the National Register, they would have to be exceptional. None of these buildings can be considered exceptional. They are ordinary commercial and office buildings of their period.

In conclusion, there are presently no known buildings within the APE that are listed or eligible for listing on the National Register of Historic Places.

5. Information from Local Organizations

No information was collected from local organizations. The Greater East Los Angeles Cultural Heritage Survey was reviewed. None of the subject properties were listed in this survey published in 1979.

I. INTRODUCTION WITH PROJECT DESCRIPTION AND LOCATION

CDC Project Name/No.: Red Cross Mixed Use Construction Project	Location: 5051 E. 3 rd Street East Los Angeles Los Angeles County	Thomas Bro. Grid: Pg. 635, H6	Assessor Parcel Nos. 5250-003-901, 902 & 903	CDC Contact: Donald Dean Environmental Officer (323) 890-7186
---	--	---	---	---

This report was prepared at the request of Donald Dean of the Los Angeles County Community Development Commission (CDC). It presents the results of a Phase I archaeological investigation conducted by Conejo Archaeological Consultants (Conejo) for the Red Cross Mixed Use Construction Project. Public funds will be used in the demolition of an existing 2-story commercial building, and construction of affordable housing and retail at 5051 E. 3rd Street in unincorporated East Los Angeles County (Exhibits 1, 2 & 3). The new 4-story structure will contain 60 units of affordable units. The ground floor will include approximately 9,000 square feet of commercial space 2,100 square feet of recreational space. The project includes both subterranean and ground level parking spaces. Offsite improvements will include pavement repair, curbs, gutters, sidewalks, and utility installation.

This archaeological study was undertaken in compliance with Section 106 of the National Historic Preservation Act and its implementing regulations under 36 CFR 800 (as amended). This study also complies with Section 21083.2 of the California Environmental Quality Act.

II. STUDY FINDINGS

Based on the South Central Coastal Information Center's (SCCIC) record search results, survey findings and the extent of previous ground disturbance within the project's area of potential effect (APE), the Red Cross Mixed Use Construction Project will not impact any archaeological resources. Therefore, no further archaeological investigations are warranted prior to project approval. In the unexpected event that prehistoric and/or historic cultural materials are encountered during construction, all earth disturbing work within the vicinity of the find must be temporarily halted until a qualified archaeologist can evaluate the nature and significance of the find, as detailed in Section VI of this report.

III. ENVIRONMENTAL SETTING

Physical Environment: The project's approximate 0.95-acre APE consists of Assessor Parcel Numbers 5250-003-901, 902, & 903 (Exhibit 2). The subject property is located at the northwest corner of the E. 3rd Street and Woods Avenue in a mixed commercial and residential area of unincorporated East Los Angeles. The APE is bordered by single-family residences to the north; by Woods Avenue and Kaiser Permanente Hospital to the east, by E. 3rd Avenue and commercial

development to the south, and by a Los Angeles County Sheriff Station to the west.

A 2-story commercial building and associated parking lot are currently located on the subject property. Where not built or paved over the property is landscaped. There are no stands of native vegetation within or adjacent to the project APE. No natural drainages occur within or adjacent to the project APE.

Cultural Environment:

Prehistory. The project site lies within the historic territory of the Native American group known as the Gabrielino, one of the wealthiest, most populous, and most powerful ethnic nationalities in aboriginal southern California (Bean and Smith 1978). The Gabrielino followed a sophisticated hunter-gatherer lifestyle, and were a deeply spiritual people (McCawley 1996). The Gabrielino territory included the Los Angeles Basin (which includes the watersheds of the Los Angeles, San Gabriel, and Santa Ana Rivers), the coast from Aliso Creek in the south to Topanga Creek in the north, and the four southern Channel Islands. For in depth information on the Gabrielino, the reader is referred to McCawley's (1996) *The First Angelinos, The Gabrielino Indians of Los Angeles*.

History. The following historic use of the project APE is based on information provided in the Phase I Environmental Site Assessment (ESA) prepared by DCI Environmental Services (2006). The ESA included a review of aerial photographs, Sanborn Fire Insurance Maps, USGS 7.5' Topographic Maps, and building records, and is summarized below.

Historic aerial photographs indicate that the subject property in 1928 was fallow land. In 1938 the project APE and surrounding lands were planted in citrus groves. By 1953, orchards to the north of the APE were replaced by residential development and to the south of E.3rd Street by commercial development. A small building (likely a service station) is located within the eastern end of the APE in 1953. In 1960 a building is located in the central portion of the APE and the smaller structure previously noted is gone. The central building is still present and a new smaller structure is located at the eastern end of the property in 1968, 1971 and 1976 aerial photographss. In the 1982 aerial photograph the current existing structure on the subject property is present and the two previous structures were no longer present. The 1994 and 2002 aerial photographs show little change from the 1982 aerial photograph.

Historic Sanborn Fire Insurance Maps were not found for the project APE. Review of the 1925 USGS 7.5' Topographic Map shows the subject site as vacant land, possibly in agricultural use.

Both E. 3rd Street and Woods Avenue are present on the 1925 map.

The earliest permit for the project APE is for a septic tank connection completed in 1964; the applicant was LA County F & A Federal Credit Union. Another sewer permit was issued in 1972. The earliest building permit on file for the subject property was for construction of a service station building issued to American Oil Company in 1966. The service station was located on the eastern portion of the project APE. Another building permit was issued in 1977 for the demolition of the service station. Underground storage tanks were removed at that time.

IV. SOURCES CONSULTED

Results:

South Central Coastal Information Center

A record search was conducted at the South Central Coastal Information Center housed at California State University Fullerton on March 12, 2007. The record search identified no prehistoric or historic sites within a 0.5-mile radius of the project's APE.

Eleven archaeological surveys have been conducted within a 0.5-mile radius of the project APE. None of these surveys included or were adjacent to the project APE.

Federal, State & Local Historic Listings

The listings of the National Register of Historic Places (NRHP) includes no properties within or adjacent to the project APE (National Park Service 2007). There are no California Historical Landmarks or Points of Historical Interest located within or adjacent to the project APE (Office of Historic Preservation 2007, 1992).

The California State Historic Resources Inventory lists no evaluations for the 5000 block of E. 3rd Street in East Los Angeles.

Historian Judy Triem is in the process of conducting a Section 106 review of the project APE's built environment.

V. FIELD METHODS

The approximate 0.95-acre project APE was surveyed by Mary Maki on March 12, 2007 (Exhibits 2 & 3). Ms. Maki is certified by the Register of Professional Archaeologists (RPA) and has over 17 years archaeological experience in southern California.

As approximately 95 percent of the project APE was built or paved over, a systematic archaeological

survey was not feasible. Instead all visible ground surfaces within the landscaped areas were closely inspected. Within the landscaped areas ground surface visibility was generally. The soil on the project site was a silty sand. No prehistoric or historic archaeological resources were observed. However, the lack of ground surface visibility across the vast majority of the APE rendered the survey results inconclusive as to the absence of prehistoric or historic resources.

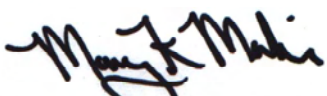

The project APE has been extensively disturbed by grading and trenching associated with the construction and demolition of various structures, including the burial and removal of gas tanks.

VI. REMARKS

Although survey efforts were limited by development of the project APE, based on the SCCIC record search results and the extent of past ground disturbances on the property, no impact to archaeological resources is anticipated from project development. Therefore, no further archaeological investigation is warranted prior to project implementation as long as the following two recommendations are included as conditions of project approval.

1. In the event that archaeological resources are unearthed during project construction, all earth disturbing work within the APE must be temporarily suspended until an archaeologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. A Gabrielino representative should monitor any archaeological field work associated with Native American materials.
2. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the Los Angeles County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.

Mitigation Monitoring and Reporting Program

Mitigation Measure/Condition of Approval	Action Required	When Monitoring to Occur	Monitoring Frequency	Responsible Agency or Party	Compliance Verification		
					Initial	Date	Comments
Historic, Cultural, and Archaeological Resources							
No archaeological resources are known to be on the project site. However, in the event that archaeological resources are unearthed during project construction, all earth disturbing work within the project's archaeological area of potential effect (APE) must be temporarily suspended until a qualified archaeologist has evaluated the nature and significance of the find. A Gabrielino representative should monitor any excavation associated with Native American materials. After the find has been appropriately mitigated, work in the area may resume. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.	Field verification during construction	Throughout construction	Periodically during construction	CDC			
Hazardous Materials							
In accordance with the Phase II Environmental Site Assessment for the project site, conducted by Converse Consultants, the following mitigation measures shall be implemented prior to project development: <ul style="list-style-type: none">Concentrations of TPH-G in samples from three borings (GP-4, GP-5 and GP-10) at a depth of 5 feet below ground surface (bgs) were reported in excess of the (Maximum Soil Screening Level) MSSL. These samples, as well as the 5-foot sample from GP-11 and the 10-foot sample from GP-4, were reported to contain various VOCs at concentrations exceeding the respective	Prior to construction	Completion of remedial activities	Once	CDC

					Initial	Date	Comments
<p>PRG-r values. As a result, soil within the vicinity of these boring shall be removed to a depth of 10 bgs.</p> <ul style="list-style-type: none"> The concentration of benzene in the soil sample from boring GP-1 at a depth of 15 feet bgs exceeded the PRG-r. Therefore, the soil within a 10-foot by 10-foot area in the vicinity of boring GP-1 to a depth of 20 feet bgs shall be removed and disposed. All remedial activities shall be overseen by the Los Angeles County Fire Department's (LACFD) Site Mitigation Unit in order to obtain a "closure" or "no further action" letter with regards to contaminants identified in the onsite soil. 							
Noise							
<p>In order to ensure an acceptable interior noise environment at the proposed apartment complex (45 dBA or less), the following shall be included in project design:</p> <ul style="list-style-type: none"> Air conditioning or a mechanical ventilation system shall be provided so that windows and doors may remain closed. Windows and sliding glass doors facing 3rd Street and Woods Avenue shall have a Sound Transmission Class (STC) rating of at least 33, per ANSI specifications. Exterior doors facing 3rd Street and Woods Avenue shall be solid-core with perimeter weather stripping and threshold seals. 	Verification that project design includes noise attenuation features	Prior to construction phase	Once	CDC

Mitigation Monitoring and Reporting Program

Mitigation Measure/Condition of Approval	Action Required	When Monitoring to Occur	Monitoring Frequency	Responsible Agency or Party	Compliance Verification		
					Initial	Date	Comments
Solid Waste Recycling							
Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.	Verification that project design include recycling features	Prior to construction phase	Once	CDC			
Water Supply							
Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design: a. Landscaped areas shall be designed with drought-tolerant species, minimizing to 50% areas dedicated to turf. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice. b. Structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.	Verification that project design include water conserving features	Prior to construction phase	Once	CDC			
Additional Modifications							
Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission of the County of Los Angeles. Any modifications must continue to satisfy the requirements of NEPA and CEQA, as determined by the County.
